Mrs Evan Jones Passed Away Suddenly

Died In The Hospital After Undergoing Operation

Redcliff citizens were startled last Sunday evening as the news spread around that Mrs. Evan Jones had suddenly passed away at the Medicine Hat Hospital.

The shock was all the harder as few of her many friends knew she had been ill, since she had been around in her usual good health and jovial spirits only a few days before.

On Friday Mrs. Jones was taken suddenly ill from what was presumed to be appendicitis and was taken to the hospital to undergo an operation. While undergoing the operation it was found she had a seriously developed cancer of the stomach and that her life was now a matter of a few days at the most. A few hours after the operation she passed away from shock and hemorrhage.

Deceased was born in Lamb, Ontario, England 36 years ago. She came to Canada when quite young and sixteen years ago was married. For a number of years past she has resided in Redcliff.

Beside her husband deceased leaves her father and mother, Mr. and Mrs. Thomas Duff, three sisters and five brothers, Mrs. A. Ross, Mrs. E. T. Cook and Patricia; John and James all of Redcliff; Joe and Alf of Mountain Park and Tom of Carleton Place, all of whom are here for the funeral, which takes place Thursday afternoon at 2 o'clock.

The late Mrs. Jones was one of the most popular young people in town. Her interest in church work and her enthusiasm as an officer of the local Lethbridge lodge, together with her bright, happy and cheerful disposition won for her a large circle of friends who greatly mourn her passing.

The funeral will be under the direction of Vera Rebekah Lodge.

Italy Rejects All The Peace Proposals

Diplomatic Channels Can Not Settle Affairs

"I see no basis for further discussion of the Ethiopian situation," said Baron Aloisi Italian diplomat, "and I have no hope for Geneva. Italy does not want to leave Geneva but if we are led to the door, we will have to leave."

The Italian diplomat, who acted as spokesman for Premier Mussolini in the "adjourned" tri-power conference with France and Great Britain, said Italy had not even decided as to whether it would send representatives to Geneva September 4 for the League of Nations session.

Asked if the Italian expected a "long struggle," Baron Aloisi said: "We have studied the question and we are perfectly assured. We have plenty of men and plenty of money."

"Diplomatic channels have little chance to settle our affairs with Ethiopia."

Redcliff Young Man Weds Lethbridge Girl

Weeks - Wallace

Many friends attended the wedding at St. Ann's church in Lethbridge on Wednesday afternoon when Norma Elizabeth, daughter of Mr. and Mrs. A. C. Wallace of Lethbridge, became the bride of Wallace C. W. Weeks of Redcliff.

The Rev. James Marshall officiating. Following the marriage ceremony a reception was held at the home of the bride's parents for immediate friends and relatives.

Mr. and Mrs. Weeks left for Calgary and Banff and will be at home in the Marshall Apartments, Medicine Hat, after Sept. 3.

Rust Cuts Yield in Manitoba and Sask.

Good Yields in Other Sections of Prairie Provinces

The fifth crop report of the Winnipeg Free-Press said 7,000,000 acres of wheat in Manitoba and the eastern half of Saskatchewan are affected by stem rust and yield all over the west have been reduced by high temperatures.

Against these crop reduction factors must be set the excellent yields and grades in other parts of Saskatchewan and in Central and Northern Alberta, the report said. "These Alberta crops are late, however, and damage from frost is feared."

Mrs. W. Wheeler was the hostess to a group of young people at a charming little party at her home on Tuesday evening.

Cards were played. First prize went to Miss Jean Moore and second prize went to Miss Agnes H. Moffat. During the evening dainty refreshments were served by the hostess.

Churches

ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a.m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar. 10 o'clock Sunday at Trinity 11 a.m. Matins. 7 p.m. Evensong and Sermon.

ROLDEN MEMORIAL UNITED CHURCH

3 p.m. Service at Bowell. 7:30 p.m. Evening Worship Subject: "The main lesson for us to learn from the Early Church."

"The Love of Christ, spread from heart to heart, from soul to soul, is the cure for all the ills of society."

Social Credit Party Sweeps Alberta

Premier Reid and Cabinet Annihilated

J. L. Robinson Elected Here with Big Majority -- Four S. C. Candidates Elected in Calgary, 1 Conservative and 1 Liberal -- Howson the Only Liberal Elected in Edmonton so Far -- Only 1 U.F.A. in Running

Social Credit candidates made a clean sweep of the province in the general election yesterday. Premier Reid and his cabinet were down to defeat in the landslide and all other parties are practically annihilated. Latest figures of the recent standing is:

Social Credit	60
Liberals	2
U.F.A. Leading	1
Conservatives Elected	2

The remainder of 9 seats are in doubt.

In Calgary four S.C. candidates were elected. These are Manning, Gaskie, Anderson and Hugal; one Conservative Irwin and one Liberal Bowler. The Liberal leader, Howson was elected in Edmonton.

Redcliff polled the biggest and most complete vote in its history. In all 522 votes were cast which meant that only 12 who possibly could have voted failed to do so and that a few were ill to come out.

Robinson, the Social Credit Candidate headed the pole here by an overwhelming majority.

Robinson	3,355
Lang	1,247
Bullivant	659

Empress and Cypress, the two adjoining constituencies also went strong for Social Credit.

David Lusk (S.C.)	1,355
V. C. Smith (U.F.A.)	591
K. A. Pollock (L)	23.

CYPRESS

A. Flannery (S.C.)	1,167
E. C. Black (L)	484
Don. P. Baker (U.F.A.)	415
J. H. Duncan (Ind)	32

Heavy Frost Damage In Peace River District

Very Little Bread Wheat In Manitoba

The Dominion Bureau of Statistics reported, "spotted but heavy frost damage" in the grain areas of the "Peace River" district of Alberta and over a 25-mile stretch of country running from west of Edmonton to Scott, Alta. It said heavy snows and rain caused lodging of crops in the Peace River country."

The report said information from Manitoba and Southwestern Saskatchewan were the previously-reported rust attack was most severe where "extensive" puccinia and that very little bread wheat will be worth threshing in Manitoba since the yields are low and the grade poor."

It added Durum wheat also was seriously affected.

St. Ambrose Church. Lawn. Garden Party, Wednesday Aug. 28th at 8 p.m. Cards in Parish Hall. Dancing on lawn, Hoop-La. Little Ball Shoes. Prizes: 20c and 25c.

Will Rogers, cowboy philosopher, actor and air travel enthusiast, and Wiley Post, who circled the earth alone in a plane, were killed last Wednesday when their plane crashed 15 miles south of Point Barrow in northern Alaska.

C. P. R. seed planting car no 121 will be at Redcliff Thursday and Friday Aug. 29th and 30th. An expert will lecture on and demonstrate the most approved methods of seed and tree planting. The public is cordially invited to attend these lectures the times of which will be announced later or can be obtained on application to A. R. Palantyne.

Lethbridge Herald Slips Just a Little

The Lethbridge Herald which usually is very fair and often has some good criticisms and suggestions in its editorial columns, slipped a little in its lead editorial last Tuesday, under the heading: "Making Security Legislation Possible."

The article draws attention to the many times when suggestions have been made to change the B. N. A. Act but says that always there was difficulty in getting the provinces to agree.

The Herald agrees that the B. N. A. Act should be changed to bring it up to date and that the Liberal party is in favor of having it changed, but suggests that the way to bring this about is to have Liberal governments in all the provinces and a Liberal government at Ottawa.

In effect the Herald says that the B. N. A. Act changed if a Liberal party is in power at Ottawa and in all the provinces but they might change their mind if a Conservative government was in power at Ottawa or if the Liberals were not in power in Alberta.

Miss Norma Osgood is at present visiting friends in Medicine Hat.

Mr. and Mrs. Durand, of Taylor, Sask., are in town for the funeral of Mrs. Jones. Durand is a sister of Mrs. Jones.

Mrs. Manary and Son, Verna McDonald and Mrs. Nolan, all of Calgary spent a few days in town this week the guests of Mr. and Mrs. G. Manary.

Mrs. Lakey Sr. leaves Thursday evening for a three weeks vacation in Vancouver and Nanaimo visiting friends and relatives.

Harvesting and thrashing is now general in this district. Some crops are showing a fair average and others are going only 5 and 6 bushels to the acre.

Mr. and Mrs. F. Britt and family returned home Monday after spending their holidays on a motor trip through the mountains.

Rev. Father J. B. Moriarty parish priest at Banff and formerly of Medicine Hat, died last Saturday. Deceased was well known here.

Mrs. J. Kamich and small daughter, Betty, of Beiseker spent the week-end with Mr. and Mrs. C. Newham. They returned home Monday evening.

Mr. and Mrs. Matthews and daughter of Ponoka, were guests of Mr. Matthews' brother, Mr. J. Hitchen and Mrs. Hitchen over Sunday on their way to Taylor, Sask., on motor.

To celebrate the opening of their large new show window J. J. Moore and Son gave away a fine new living room table the one drawing the lucky number during their furniture sale. Mr. Emil Schmidt, of Redcliff drew the lucky number and won the table.

Local Football Club Deadlock in Games

Will Play Off Finals in Medicine Hat Friday Night

Medicine Hat and Redcliff football teams are still deadlocked in the competition for the championship of the province in this line of sport.

Two games in this series have been played during the past week and still the winner is not yet decided. The first game was played in Medicine Hat last Saturday evening but the game was called on account of darkness with 20 minutes still to play. When the game was called Medicine Hat had a comfortable lead of 5 goals to 0.

The second game was played here Tuesday evening and resulted in a draw of 1 to 1. The game was very tame throughout as both teams showed a very noticeable lack of training in making any display of team work that no enthusiasm was worked up by either players or spectators until the score tied towards the finish of the second period.

Personnel of Wheat Board Has Been Named

John I. McFarlane Will Be The Chairman

The appointments of the Canadian Wheat Board has been announced. John I. McFarlane, chairman, D. L. Smith vice-chairman, and the third member is H. C. Grant. Mr. McFarlane well known as a general manager of the Canadian Wheat Board since 1930 and the man who conducted the government wheat stabilization operation.

D. L. Smith was formerly sales manager for the Canadian Wheat Pool. Literally the Pool's representative in Europe, and for the past year he has been operating a grain importing business of his own in London, England. H. C. Grant is professor of economics in the University of Manitoba, with a wide knowledge of farming conditions in Western Canada.

The Board held its first meeting and announced that futures trading would soon be resumed on the Winnipeg exchange. The minimum price will shortly be announced. The exchange will be permitted to operate under certain regulations.

An advisory board of seven members has been appointed to act along with the wheat board. The members are: H. Hutchison of Duhamel, Director of Alberta Wheat Pool; a member of this advisory board.

To Aid Farmers Who Were Hailed Out

Will Be Able To Obtain Loans From The Banks

Farmer who were hailed out in Alberta will be given financial assistance through an agreement between the banks and the provincial government. It was stated by Hon. Geo. Healey.

The farmers will be able to obtain loans direct from the banks. They will put up their own security, Mr. Healey stated.

TOWN OF REDCLIFF

The Local Tax Arrears Consolidation Act 1935

The Council of the Town of Redcliff have passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing. All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act.

Any person firm or corporation who is the owner of any parcel of land in the town of Redcliff against which there is a notice for arrears under "The Tax Recovery Act 1929."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application, in the case of lands which have been finally acquired by the town of Redcliff, but not sold, or such persons personal representative.

In such cases where the applicants property is to be exposed for sale at the forthcoming Tax Sale on August 24th, 1935 such applicants should make their applications in time for the council to consider same previous to that date.

Upon receipt of the application the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes if the same were consolidated and the applicant shall deposit with the Secretary Treasurer one-fifth of such sum.

In such cases where the application to consolidate is made after the 15th day of November, 1935 the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current years taxes.

In any event the current years taxes shall be paid by the

applicant on or before the 15th day of December.

When the application is granted the deposit shall be applied to the applicant's consolidated arrears otherwise it shall be repaid to him.

In case the application is not granted provision is made for said Act for an appeal to the Minister of Municipal Affairs.

The Council may on the applications in writing of any person liable under a consolidated agreement under this Act and with the approval of the Minister, by resolution, extend that agreement for one year and have payment of the installment payable under the agreement for any one year of the years for which such agreement is made in case it is thought proper so to do by reason of crop failure or other circumstances.

No buildings fences fixtures or other improvements shall be removed from any land in respect to which there is a substantiated tax consolidation agreement.

To those who properly come under the provisions of the above Act all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in force.

British Press Worried Over Ethiopian Picture

Advise Britain To Drop Out Of Whole Business

The London Daily Telegraph deprecated any assumption, without a test, that Italy will deliberately fust the League which must consider the Ethiopian problem next month.

"With all her energies absorbed in the African enterprise Italy might well be disabled from playing that part in European affairs which Mussolini has envisaged for her," it declared.

Ethiopia continued the main topic of editorial comment and on the whole it was pessimistic. The Daily Mail repeated its exhortation to the British cabinet to "drop out of the whole business," declaring that Britain was playing poker with an empty hand, while Lord Beaverbrook's Daily Express was much of the same opinion.

Taking Pictures Of Thought

Minute Electrical Currents Are Recorded By New Device

Taking motion-pictures of a thought as it is formed in a brain is another scientific triumph recently accomplished by a series of experiments carried out at the Moscow Institute of the Brain. It has been known for some time that the brain, in the process of thinking, generates minute electrical currents. Several preliminary experiments were, therefore, carried out on animals, recording responses to such outside influences as light, heat and cold.

The latest experiments have been on human beings. The patient sits facing the movie camera and two minute needles are pressed into the base of the temples. These are connected to wires which conduct the electric currents set up by the brain in action to a transformer. Here the impulses are magnified one thousand times and are made to actuate a hand on a dial.

A slowly-moving film photographs the movements recorded on the dial. When the brain is at rest the indications are small and regular and appear on the film as a perfectly even line; but as soon as a patient thinks of a particular subject, the indications engendered by thinking record the needle on the dial flashing upwards and forwards and the records rugged range of peaks and valleys, finally settling down into a straight line as the patient re-ordinates his thoughts and prepares to answer.

The device is intended for use in the cure of mental ailments.

Should Be Adaptable

Rocky Mountain Guide Thinks Moose Could Do Work Of Horse

The moose, now a target of hunters' guns, may some day replace the horse as the "beast of burden" in Canada's north country.

Major Fred Brewster, Rocky Mountain guide and hunter, who is toying with the idea of trying to domesticate moose as an experiment, believes it possible.

"The moose," he declares, "is the natural beast of burden in many parts of Canada. While much of the country is ideal for the horse in the summer, the winters in the mountain areas are severe for an animal which, after all, originated in a much warmer climate than ours and was first imported into the northern latitudes of the continent.

"The moose is strong and with care should be adaptable both for riding and for driving purposes. The one or two attempts at this domestication of which I know have been definitely successful."

The moose would be of great advantage over the horse in winter, Brewster believes. The moose could find his way on the tips of willows and the snow, and would not have to be fed, or paw through the frozen ground. In addition, the moose can make his way through snow in which a horse is helpless.

"My notion is to catch two or three calves and let my men, who are used to the handling of horses, work on them," he said. "The problem should be no too difficult, as moose, along with deer, mountain sheep and goats use the same range as our horses."

Would Not Give In

A closed-draft farmer served a local house with three dozen eggs every week. One week he found that he had inadvertently sent one extra. Determined not to lose on the deal he went to the house. The husband admitted him.

The farmer stated his errand. The householder was amused; but the farmer was adamant.

"Surely we're not going to quarrel over a matter like that!" said the householder. "Let's have a drink to settle it. What will you have?"

"Eggs and milk," said the farmer.

The Absolute Minimum

"Johnnie," asked his mother, "what is all that noise on the back porch?"

"Mother, there's a thousand cats out there," said Johnnie, after a survey.

"Johnnie, you shouldn't exaggerate. Now, how many are there?"

"There are five hundred, anyway."

"Are you sure?"

"Well, there's fifty."

"Johnnie, did you count them?"

"Well, there's our cat and Thompson's and I won't count down another cat."

Read note are being used as buttons for women's clothing.

WHERE 40,000 DIED IN THE INDIAN EARTHQUAKE

Here is a picture received from India showing the devastation in Quetta following earthquakes that destroyed the gateway to mountain provinces and killed 40,000 of the city's inhabitants. Survivors pitched camp on the outskirts of Quetta with the few possessions they were able to save from the ruins. British medical officials ordered the destroyed city evacuated to prevent an outbreak of plague.—Copyright, Hearst Metronews.

House Put To A Test

Whitetail Wranglers In Grave Concocted Over Chances Of Elusive Rabbit

After Stanley, new president of the Board of Education, London, Eng., is frankly puzzled. And it's all over a little question in simple arithmetic set in a secondary school entrance paper for Welsh children of 11 years old. This is the question:

"A rabbit 40 yards from its burrow runs a greyhound six yards away. The rabbit makes for its burrow with leaps of five feet. It is immediately caught by the greyhound with leaps of nine feet. The rabbit, however, takes three leaps for every two of the greyhound's. How far from its burrow is the rabbit caught?"

W. G. Cove, Labor member for Aberavon, read it to a laughing House of Commons from a copy of the examination paper. "I doubt," said Mr. Cove, "8 2/3 per cent. of the members of the House could pass it. I hope that the minister will give us the answer."

Mr. Stanley was not to be caught so lightly. "Is the Hon. member prepared to give me two hours to do it?" he returned guardedly.

"Yes," returned Mr. Cove, "provided you don't consult with your officials."

The House roared at the thought of Whitetail wranglers in grave consultation over the chances of an elusive rabbit.

In the end, the minister of education had to confess himself beaten. "I will not attempt to answer the question," he said. "I never recall of Welsh arithmetic."

Members still differ over the precise spot where the greyhound caught the rabbit.

New Radium Detector

Clicks Like Men When Near Any Mining

An instrument that clicks like a hen when it gets near radium has been invented by the National Physical Laboratory at Teddington.

The purpose of the instrument is to assist hospitals which have temporarily mislaid one of the radium needles used in treatment.

The new instrument has already been used to find a needle which was suspected of having been washed down a hospital sink. Water poured down the sink had been tested for radium activity, but without result.

Every trap in the waste pipe had been taken out and still no trace of the missing needle had been found. Then the laboratory's help was sought.

The "radium hen" was brought along and quickly let its clicking way to the point in the pipe where the needle had lodged.

The Canadian "counters" covered 15,000,000 acres chasing criminals last year, over 35,000,000 miles of which were not covered on horse-back.

Certain frogs, lizards and snakes are equipped with laparoscopes; that is, some part of the body reveals to close the hole in the ground where the animal takes refuge.

The current in a flash of lightning ranges from about 4,000 amperes to 200,000.

Monarch Of The Law

London Baby Has Honor Conferred Upon Him By School Children

P. C. George Harrison, Blackpool, Eng., is a proud man. He has had conferred upon him an honor which must be unique in the history of the police force.

It happened outside Devolish Road junior girls' school. For some time he has shepherd the little girls over a busy crossroad and, though he did not suspect it, the youngsters had grown to love him.

He was suddenly surrounded by a group of girls. A brown paper parcel was thrust into the puzzled policeman's hands and the little girls bolted.

Inside the parcel Harrison found six handkerchiefs, a tie, a pin, and a penny—and this note:

"Dear Sir,—I am sure we are all very sorry you are leaving us, and we hope you will come to see us."

"The girls saved up to buy these little tokens. We hope our present will make you happy. Wishing you success and happiness in future years."

"From the little girls of Five X and Four X, Devonshire Road School, to Mr. Harrison, P.C."

The penny (it will surely be a lucky penny) was the balance of the gift fund.

"The girls' teachers knew nothing about the presentation."

Could Work At Home

"George Washington Tube," said the judge, sternly, "you're entirely out-of-account and shillime—and I'm going to send you away for a year with hard labor."

"Please, Judge," interrupted Mrs. Puckle from the rear of the court-room, "will you please be kinder split that sentence? Don't send him away from home, but let that hard labor stand."

A scientist calculated that there are six trillion spores in a giant puff of dust from the rear of the court-room, each spore being capable of producing another one of these big fluffy plants under favorable conditions.

When a motorist wants five gallons of gasoline at one Kansas City filling station all he has to say is: "One Dime."

A sign on the station reads: "The Dime—Five gallons for 75 cents."

FANCFUL FABLES

IT'S THE ONLY FISH IN THE LAKE YOU SEE... SO WE'LL THROW IT BACK AGAIN TOMORROW.

A letter written nearly a century ago has arrived at the post office in time for delivery to a man who has been dead for 99 years. The letter was addressed to Col. John By, founder of Ottawa. It bore a postmark's recent date, which heightens the mystery. It was mailed from Vancouver.

At the last session of parliament, the Dominion government made an appropriation of \$750,000 for a tree-growing and planting campaign.

Officials at the two forestry farms and tree planting stations, Indian Head and Sutherland, planted millions of seeds, and though the actual number of trees cannot be counted accurately, there will be close to 20,000,000 available for the farmers of the drought areas.

This year these two stations provided 9,000,000 trees for the farmers of the prairie provinces.

The growing season at both stations, report officials, has been the best in two or more decades. There are millions of caragana, maple, ash and elm seedlings, hundreds of poplar and willow cuttings, and some spruce and pine yearlings.

Spruce and pine will be obtainable at nominal cost, for these are hard trees to start growing, and need much attention before they are sent out from the tree planting stations.

Various agencies have been at work in the west during the past five years of drought to bring about the necessity of tree planting as a means of rehabilitating the wind-swept prairie. Notable among these is the Canadian Forestry Association with its tree planting camps.

Farmers have seen the wisdom of planting trees, and have experienced good results from protection afforded by trees, especially in their gardens. In the fall of 1924 forestry station officials prepared for calculating the scope of the work and tree planting and the result, according to an announcement from Ottawa, has been entirely satisfactory.

While the forestry station at Indian Head is larger in area, there do more experimental plantings and so both stations will supply about the same number of trees for farmers in 1925.

Some Curious Calendars

Primitive People Have Own System Of Telling Seasons

In the South Sea Islands the "moon stick" is used to determine the seasons. A notch is cut in the stick after each passing moon.

Bornio used a calendar consisting of various lengths of tattooed poles. The Dyaks have a count whereby they tell the season by the length of the sun's shadow.

Calendar-makers took the country in the season of sowing and plant these colored poles on the farms. By a system of queer calculation they adjust these to a certain length marked on the ground. Invariably this shadow-marking proves accurate, and in due time the calendar-maker again takes the farms to receive his payment of part of the crop.

Some American Indians keep five bundles of thirty sticks, pulling out one stick for each day. The last bundle is repeated in each half-year to level things up, and the middle bundle is split in two to judge the approach of mid-summer or mid-winter.

Carrying Many Letters

Nacopale Taking Over 200 Messages To Northern Posts

When the R.M.S. Nacopale sailed from Montreal on July 23 on the official visit of Canada's first visit to the 1925 government expedition into the Northwest.

Chancellor Adolf Hitler's ambassador at large, told the British delegation of Great War Veterans at a luncheon on the first day of their official visit to the German capital.

Chancellor Adolf Hitler was the first to make the British veterans welcome, entertaining them by the Duke of Gloucester from his "Australian" in the chancellery, and then to its gardens.

The luncheon given by von Ribbentrop was attended also by Prince von Wilhelm of Prussia, son of the former Kaiser.

Alluding to relations between Great Britain and Germany, von Ribbentrop declared, "There is no more trouble or misunderstanding between Germany and Great Britain. Since June 18, the date of the naval accord, I believe all persons realize that the first step was made in the way of practical peace."

Major Oltke, in reply, said: "We British have fought the Germans only once, and I can say for the rest of the world that should not be repeated."

Major Oltke later presented the Cross of Honor of the British Legion to von Ribbentrop, to Franz Sauter, minister of labor, and chief of the Stahlheim and other German leaders.

At the last session of parliament, the Dominion government made an appropriation of \$750,000 for a tree-growing and planting campaign.

Officials at the two forestry farms and tree planting stations, Indian Head and Sutherland, planted millions of seeds, and though the actual number of trees cannot be counted accurately, there will be close to 20,000,000 available for the farmers of the drought areas.

This year these two stations provided 9,000,000 trees for the farmers of the prairie provinces.

The growing season at both stations, report officials, has been the best in two or more decades. There are millions of caragana, maple, ash and elm seedlings, hundreds of poplar and willow cuttings, and some spruce and pine yearlings.

Spruce and pine will be obtainable at nominal cost, for these are hard trees to start growing, and need much attention before they are sent out from the tree planting stations.

Various agencies have been at work in the west during the past five years of drought to bring about the necessity of tree planting as a means of rehabilitating the wind-swept prairie. Notable among these is the Canadian Forestry Association with its tree planting camps.

Farmers have seen the wisdom of planting trees, and have experienced good results from protection afforded by trees, especially in their gardens. In the fall of 1924 forestry station officials prepared for calculating the scope of the work and tree planting and the result, according to an announcement from Ottawa, has been entirely satisfactory.

While the forestry station at Indian Head is larger in area, there do more experimental plantings and so both stations will supply about the same number of trees for farmers in 1925.

The bureau, of an eight-hour water pipe on the top floor of Buckingham Palace caused some excitement the other day. The break occurred at four in the morning, and the first people to be aware of it were sleeping housemaids, who awoke in fright to find an alarm of Great War Veterans at a luncheon on the first day of their official visit to the German capital.

Chancellor Adolf Hitler was the first to make the British veterans welcome, entertaining them by the Duke of Gloucester from his "Australian" in the chancellery, and then to its gardens.

Reforestation For Princes

Twenty Million Trees For Farmers Of Three Western Provinces

Farmers of Manitoba, Saskatchewan and Alberta in 1925 will be able to obtain close to 20,000,000 yearling trees to plant in the drought areas of this number Saskatchewan will get at least half, if not more for reforestation has taken hold in the province and farmers appear to be best on getting windbreaks on their farms.

At the last session of parliament, the Dominion government made an appropriation of \$750,000 for a tree-growing and planting campaign.

Officials at the two forestry farms and tree planting stations, Indian Head and Sutherland, planted millions of seeds, and though the actual number of trees cannot be counted accurately, there will be close to 20,000,000 available for the farmers of the drought areas.

In The Cause Of Peace

British War Veterans Welcomed In Berlin By Officials

"The mission of war veterans throughout the world is to reconcile the people of various nations and not to take to politics," Joachim von Ribbentrop, Chancellor Adolf Hitler's ambassador at large, told the British delegation of Great War Veterans at a luncheon on the first day of their official visit to the German capital.

Chancellor Adolf Hitler was the first to make the British veterans welcome, entertaining them by the Duke of Gloucester from his "Australian" in the chancellery, and then to its gardens.

The luncheon given by von Ribbentrop was attended also by Prince von Wilhelm of Prussia, son of the former Kaiser.

Alluding to relations between Great Britain and Germany, von Ribbentrop declared, "There is no more trouble or misunderstanding between Germany and Great Britain. Since June 18, the date of the naval accord, I believe all persons realize that the first step was made in the way of practical peace."

Major Oltke, in reply, said: "We British have fought the Germans only once, and I can say for the rest of the world that should not be repeated."

Major Oltke later presented the Cross of Honor of the British Legion to von Ribbentrop, to Franz Sauter, minister of labor, and chief of the Stahlheim and other German leaders.

Major Oltke, in reply, said: "We British have fought the Germans only once, and I can say for the rest of the world that should not be repeated."

Horse Trading Still Thrives

Toronto Horsemen Society Is Protecting Against Old Hackers

Apparently unscrupulous horse traders are still endeavoring to make a living. Recently a director of the Toronto Horsemen Society protested against a racket with worn-out hacks as the stock in trade.

Old or crippled horses are purchased by these individuals in country districts at insignificant prices. They can often be secured for a few dollars. The seller, thus, saves him the trouble of selling a shaggy and digging a hole in the back pasture.

These animals are then taken to the city and with the use of drugs and other stimulants are given an appearance of youth, health and strength. They are usually sold to peddlars and rag buyers who know nothing about horses or their care. Within a week most of the animals collapse.

This racket is almost on a par with that credited to a horse-horse dealer of an earlier generation. Coming out to the stable one morning, he found his horse in failing health. The veterinary offered no hope of even partial recovery.

Some time previously this man had been offered \$50 for the horse, after verifying the age of the animal was created and shipped. The shipper waited in some uncertainty for the result.

A month later he met his customer. Instead of the expected outcome, accompanied by violent demands for a return of money, the buyer explained that he was perfectly satisfied and had not lost any money on the deal. Naturally, the first horse dealer would be to find out how this could be accomplished.

Such information might prove valuable in his own business.

"Oh, yes, the horse was dead when it arrived," reported horse dealer No. 2.

The only person dissatisfied was the one who got the horse and gladly returned the money, too, went away perfectly happy."

Even Palace Not Excepting

Water Pipe Bursts At Buckingham Causing Some Damage

The bureau, of an eight-hour water pipe on the top floor of Buckingham Palace caused some excitement the other day. The break occurred at four in the morning, and the first people to be aware of it were sleeping housemaids, who awoke in fright to find an alarm of Great War Veterans at a luncheon on the first day of their official visit to the German capital.

WORLD HAPPENINGS BRIEFLY TOLD

Great Britain has apportioned more than \$25,000,000 to maintain her security by strengthening her air defence.

More than 1,000 letters have been established in various parts of Quebec under the \$100,000 colonization plan, Hon. Eugene Vaute, Quebec minister of colonization, stated.

Single men able to work and refuse to help farmers with their harvest, will lose their city relief allowances, Mayor G. Wilson of Hamilton has announced.

In Toronto Judge James Parker criticized the Canadian Performing Rights Society for keeping the public "in the dark" to its laud for the playing of "protected" music.

Postals of stem cut were found in wheat in the University of St. Catharines' grain field. Corn wheat, which has little resistance to the fungus, showed most of the infection.

A higher tonnage of merchant vessels is under construction in the world than at any time since 1920. Lloyd's quarterly survey from Japan, Germany leads the world outside of Great Britain, with 237,000 tons under construction.

Manitoba was 65 years old on July 15. The province was created and admitted to the Dominion July 15, 1870, though it was not until Sept. 2 of the same year that Manitoba was officially considered a unit of the Dominion of Canada.

Vancouver Island lumber mill managers have received from export sales organizations copies of the last batch of lumber orders from Japan to this continent. The order has the notation: "Not to be supplied from mills in Canada."

China Goes Modern

Campaign Against Footbinding in Peking

A campaign against footbinding in the city of Peking has been launched by Yuan Ling, famous in China as the "blue law" writer of Peking. Six regulations have been devised governing the execution of the movement.

The first regulation is that girls under 15 will not be allowed to bind their feet. Those that have already done so are ordered to unbind them immediately. Women between the ages of 15 and 30 who have their feet bound are given three months in which to unbind them. Women over 30 are permitted to unbind their feet at their leisure.

Failure to observe the new regulations results in a fine not to exceed \$10 in Chinese money (\$4 in Canadian) for the first offence. If warned a second time the fine automatically becomes \$100 in Chinese money, or about \$40 in Canadian currency.

Bird Releases Freedom

Refuses To Stay With Convid Who Befriended Him

Squire, the bird in an untold cage, had his chance at a pardon from Riverview Prison in Joliet, Ill., but scorned it for his steel and concrete home in cell block C.

The manner in which Squire escaped liberty brought a smile to John Post, 66-year-old convict, who has been Squire's master, confident and calm as a day in 1933 when he found the horned rail fluttering in the prison yard with a broken wing.

Post, sent up for burglary, mended the fracture and spent his last \$1.50 for bird seed. Squire moved into Post's cell.

But Post has still a "in air" and suggested to Warden Whipple that Squire should get his pardon. Accompanied by the warden, the old man went into the yard and tossed the bird into the air.

Squire coasted over the wall-but flew right back to Post's shoulder. "I'll keep him," said Post.

Priest Drowns in B.C.

Father E. Allard, O.M.I., one of the best known padres in the remote north country, was drowned at Copper Woods rapids, in the upper Stikine river district of British Columbia, it was stated in advice from provincial police headquarters. The news was brought by Bishop E. M. Hughes, O.M.I., spiritual head of the Roman Catholics in northern British Columbia and the Yukon, with whom Father Allard was travelling.

The British Museum has a piece of iron taken from the "Pyramid of Ghish," which is believed to date from 400 B.C., and an axe head of Egyptian manufacture dating from 1370 B.C.

Has Undertaken Big Task

Pacific Bible Unit Wants To Translate Bible For His People

Kata Bangson, son of a former headhunter and cannibal, is going to try to translate the Bible into the native language of a group of native islands in the western Solomon.

As these natives have a spoken language, that has never been written down in any form, his task looks at first sight to be tremendous. But it is an amazing feat, a reporter discovered, that some of the native tribes have vocabularies that are far bigger than those of most educated Englishmen.

The Rev. Edwin W. Smith, of the British and Foreign Bible Society, who spent 18 years among natives of Africa, said he discovered that natives often had a vocabulary of some 10,000 words—nearly as many as Shakespeare used, and you could listen to natives talking for ten hours and rarely hear a grammatical mistake.

Even university men have often made such errors as "between you and I," but analogous mistakes of that kind were seldom made by the African natives, though they could not write or read a word, and had no formulated rules of grammar.

Mr. Smith described the establishment of the natives when he showed some of them what "writing" was. One day he was in a forest cutting a tree, and he wrote a note to his wife asking her to send an axe. His note was taken by a native boy who knew an axe was wanted for his father.

But when he saw Mr. Smith look at the paper and straighten up, he was brought to school by the immediate conclusion that the piece of paper had been "speaking" and was full of the most wonderful "messages." "Mak-mak" or "paper speak" became the term for "writing."

How did the native children—raw material, as it were, of civilization—react when their care-free life is suddenly changed, and they are brought to school and to work for the first time in the history of their race to write?

Mr. Smith found that they are very quick-brained, and in the early stages probably just as quick at learning as English children, whose ancestors may have been wanderers.

Find Underground Chamber

Believed To Be Torture House Of Ivan The Terrible

Moscow excavators have announced they have discovered an underground chamber where Ivan The Terrible was said to have tortured his victims nearly four centuries ago.

Definite proof was declared to have been obtained that a chamber and passages found beneath the centre of the city near the spot where the Lenin library is under construction was Ivan's dreaded "chamber of horrors."

There, according to the stories told in Russia, Ivan had his victims torn to pieces by beasts and sometimes buried alive.

The subway diggers came across a last winter upon excavating a hole, said to have been used as a residence. Geologists said the said had been brought from some distant place. Further digging led the workmen to the remains of a court and passages which experts connected it with the czar's palace.

Ivan is popularly supposed to have ordered the construction of the underground passages in 1565 so that he could watch his henchmen torture the victims. The German adventurer, Heinrich Staden, known as the underling of Ivan, wrote in 1570 that he was said that the courtyard was damp and that Ivan, consequently, had ordered it covered with straw.

To Consolidate Friendship

War Veterans From Britain Pay Visit To Berlin

Five war veterans sent by the British Legion arrived in Berlin recently for a 10-day visit with the men they faced across No Man's Land.

Led by Major Peterborough, the Britons were sent to sound out the possibility of sending a large group of veterans to Berlin as part of a further movement to reconcile old front lines. The visit also was connected with a German effort to consolidate friendship with British men.

Matches, no doubt, cause plenty of heat here, but farmers have been enough too slow to know there is a fire hazard there as well.

Symbol of all things firm and strong, the "Rock of Gibraltar" was shown chained up to keep its summit from toppling into the sea. 2108

CUNARD WHITE STAR LINER "QUEEN MARY"

Here is the giant Cunard White Star liner "Queen Mary" as she now looks in her fitting out team on the Clyde. Recently the Clyde celebrated the 50th anniversary of the maiden voyage of the pioneer Cunard "Britannia" from Liverpool to Halifax and Boston. The voyage commenced on July 4, 1840.

Motion Picture Industry

Launching Big Production Program For Current Year

The motion picture industry is launching its biggest production program since the bumper years of 1927-28 and it may even come up to this point.

Upwards of \$150,000,000 will be spent on film making in the coming season, 50 per cent. or more of the total in California. Some will be expended in Great Britain by American companies.

Double feature programs, current in the great majority of theatres, will necessitate the production of more films than ever before, for there is a shortage now.

Pictures whose cost will range upward to \$1,000,000 each, including "Mistaken Night's Dream," "The Crusades," "Tale of Two Cities," and "The Last Days of Pompeii," among others.

Rule By Foreigners

Only One Of Europe's Dictators Is Native Born

Most of Europe is now ruled by dictators. Strangely enough, most of these dictators are not natives of the countries of which they are absolute rulers. Adolf Hitler of Germany, for example, is an Austrian by birth; Mustafa Kemal of Turkey, is a Greek from Salonika; Joseph Stalin of Russia was born in Galiat Georgia; Benito De Valera of Ireland was born in New York City; the late Josef Pilsudski of Poland was a Lithuanian. Only Mussolini, among all the more important dictators of Europe, is a native of the country he rules. He was born in Davis, Italy.

A Friendly Tip

During the day, Mrs. Brown discharged her old maid and hired a new one, who answered the door both when Mr. Brown arrived home in the evening. He carried a bunch of roses which he handed to the maid, saying: "Give these to Mrs. Brown and tell her I want to see her at six."

"All right," said the maid. "You better make it snappy, because she expects the old man any minute now."

In 1930, the United States 22,000 movie houses, valued at \$1,000,000,000 worth of admission tickets.

"A pretty quality is measured by its ability to build body tissue."

Household Arts

by Alice Brooks

The sturdy little steamer Naacoppe bade goodnight to Canada Sunday, July 14 as it steamed its way down the St. Lawrence river to its annual 10,000-mile tour of northern Canadian waters.

In a short time she will be steaming into the waters of the Arctic, carrying provisions and passengers to the isolated ports of the far north. She leaves September before she returns to Halifax.

The crowd lining the shore saw a ship of great sailing power—the ship of the Hudson's Bay Co. off to the Arctic to spend five years of learning the business of fur-trading at isolated posts of the company.

A Royal Business Man Lord Carleton, son of Princess Beatrice, and a grandson of Queen Victoria, is not in receipt of any pension from the state, says the News of the World. He has been an admirer during the Great War. He visited the peace tower in the parliament buildings and had a wreath on the altar of Remembrance. The wreath was made by Australian war veterans as a token of respect for their Canadian comrades in arms who failed to return.

Legion reached America from both Europe and Africa.

A Profitable Hobby

Stamp Collecting Very Often Brings Money To Owner

Many so-called "men" look upon the collection of stamps with disdain. They classify it as a narrow, penny-hobby on a par with whist or checkers.

Philatelists, on the other hand, are quite enthusiastic and pay little attention to their critics. The reason for their interest may be more easily understood if one considers the financial reward gained by some collectors.

Tens of thousands of dollars change hands in a large room in a Holborn, London, restaurant, not so long ago, all over postage stamps.

Professional dealers, nearly a legion, are to be found in every part of the world, walked around, talked, examined and purchased. Most of the dealers seemed anxious to do business with sheets or rows of stamps rather than with single specimens.

One of the most valuable specimens was the Black British Guinea one cent, which brought more than \$25,000 to its owner.

Stamp-collecting may seem like a nonsensical hobby, but the evidence furnished by the London show clearly proves it is a profitable one. —Arthur News-Chronicle.

Retains His Popularity

Prince of Wales Will Always Be Charming Person

At 41 the Prince of Wales is still an interesting and popular figure, though the charm of his youth has inevitably departed. As a young man he captured hearts such as those of the late Queen Mary. But his has been a happier lot than that of any of the flappers.

From his wide travels he brought back a mature conception of duty, and at home he has studied closely the lives and fortunes of his subjects. That he has never married is a disappointment. But this is a detail. No heir to the throne has more faithfully fulfilled the duties of his position—Philadelphian inquirer.

Getting all excited over a spell of bad business units a man for good business.

"A pretty quality is measured by its ability to build body tissue."

On Long Trip

Steamer Naacoppe Starts On Cruise To Arctic Areas

The sturdy little steamer Naacoppe bade goodnight to Canada Sunday, July 14 as it steamed its way down the St. Lawrence river to its annual 10,000-mile tour of northern Canadian waters.

In a short time she will be steaming into the waters of the Arctic, carrying provisions and passengers to the isolated ports of the far north. She leaves September before she returns to Halifax.

The crowd lining the shore saw a ship of great sailing power—the ship of the Hudson's Bay Co. off to the Arctic to spend five years of learning the business of fur-trading at isolated posts of the company.

Wooden Shoes Popular

Good Business Being Done By Factory In Michigan

Ten times as many wooden shoes are being made and sold now as were several years ago, Charles Van Tegen, of Holland, Michigan, operator of the only wooden shoe factory in the country, reported.

Most of the output of his workshop, however, goes to tourists. A few persons of Dutch and Belgian descent still use the sabots to work around the farm or in other jobs.

Van Tegen was a junior at Hope College when he entered the World War. In 1918 he opened his shoe factory on the second floor of his father's tobacco shop. Friends predicted the venture would fail.

Beginning with five assistants, Van Tegen now employs more than 100 men. Work is not limited to wooden shoes. However, the factory kind leave the Holland factory daily for every city in the United States.

They come from such varied materials as rubber, leather, and wood. Windmills. All are made of wood.

In 1928 Van Tegen views the success of his venture as not phenomenal. "It's just a matter of bringing out something new and being everywhere on the alert for ideas," he said.

Will Not Cut Corners

Machine Which Is Wined At Mathematics Winsard Completion

A machine which can beat the combined efforts of 10 smart mathematicians of the world is rapidly approaching completion at the Victoria University, Manchester. In the space of six minutes it will be able to do the work of 10 mathematicians.

It will never get tired, never suffer from headaches, and never misread its own figures. Sheer lack of time may compel the conscientious mathematician to make "second-best" approximations. This machine will not do that. It will "cut corners." Professor Hartree, its inventor, wants to probe many hitherto unsolved mysteries of the atom, the level of radio waves, and aeroplane flight with the aid of this robot.

Although there are 82 elements, only about 20 are essential to all life. The rest are "poisonous." Moreover, 10 per cent. of the earth's crust and the atmosphere are composed of only eight elements. These are oxygen (25%), silicon (20%), aluminum (15%), iron (10%), calcium (5%), sodium (3.5%), potassium (3.5%), and magnesium (3.5%).

Would Be Gladly Welcomed

British Workingmen On Signal To Arrive America

In response to a long-time want the British Post Office is said to be experimenting with a signal which will enable the caller to say the instrument will be waiting for the caller. It is to be a different click from that breaking connection and from the double sound which means "the cuckoo." That such a click is needed is shown by many letters in the "Punch" from London, which reads in part: "It seems extraordinarily clumsy that people have to hold on, often for several minutes, while the caller waits for the other end to be taken up again. I suppose that many hours a day are wasted in this tedious and empty employment of standing or sitting with a receiver to the ear waiting for the required voice."

Recipes For This Week

(By Betty Barclay)

AMBRASSARD STRAWBERRY TARTS

1 cup cream, whipped
1 egg white, stiffly beaten
1/2 cup sugar
1/4 teaspoon vanilla
1 1/2 cups moist, sweetened coconut
1 cup sweetened sliced strawberries
Bake 3 1/2-inch tart shells.

Combine cream, egg, sugar, vanilla, and 1 cup coconut. Place strawberries in bottom of tart shells, pile cream mixture on fruit, and sprinkle with remaining coconut. If desired, place one whole strawberry on each tart before sprinkling with coconut. Serve at once. Serves 6.

RED HANDBERRY JAM

4 cups (2 lbs.) prepared fruit
6 1/2 cups (3 1/2 lbs.) sugar
1/4 bottle fruit pectin

To prepare fruit, crush or grind about 2 quarts fully ripe berries. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottle of pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent foaming fruit. Pour quickly. Parfume if one. Makes about 30 glasses (6 fluid ounces each).

Victims Send Wreath

Prime Minister Lyons of Australia while in Ottawa paid tribute to the war veterans who had lost their lives during the Great War. He visited the peace tower in the parliament buildings and had a wreath on the altar of Remembrance. The wreath was made by Australian war veterans as a token of respect for their Canadian comrades in arms who failed to return.

Legion reached America from both Europe and Africa.

Little Journeys In Science

THE BUILDING STONES OF THE UNIVERSE

By Gordon R. Gies, M.A., F.R.S.

Scientists have discovered that in decomposing certain materials substances of such nature as lead and electricity, on always finds substances which are broken up into simpler substances are known as the building stones of the universe. At the present time 92 of these simple and functional forms of matter have been discovered.

Water can be decomposed by electrolysis into the gases hydrogen and oxygen. Red rods of mercury can be broken up by heat into mercury (quicksilver) and oxygen. For the decomposition, under certain conditions, inside the metal sodium and the greenish-yellow gas chlorine. Other important elements are iodine, iron, calcium, carbon, sulfur, nitrogen, silicon, aluminum, silver, and gold.

In recent times scientists have discovered that certain substances, known as radioactive elements, decompose spontaneously into other elements. The chemist has no control over these changes. This fact is illustrated in the metal radium, which spontaneously decomposes, producing a number of other elements, such as helium, radon, and lead.

It is a very remarkable fact that when elements unite to form new compounds, the total weight of the chemical compounds, they lose completely the weight of the original elements. This is a very excellent example of this is common salt, which contains the element sodium (a soft, silvery metal, that reacts violently with water to produce sodium hydroxide, a caustic, yellow, poisonous gas). In chemical reactions, sodium and chlorine combine to form a white compound which is a necessary part of our diet.

Another example of this is the reaction of a silver metal, that reacts violently with water to produce silver chloride, a white, poisonous gas. In chemical reactions, silver and chlorine combine to form a white compound which is a necessary part of our diet.

Interesting Local Items

Now fell in some parts of the
Crow's Nest Pass last week-end.

Mrs J. W. Wyatt and family
have returned home from a two
week's vacation spent at Elk-
water Lake.

Mrs G. H. Worts left by motor
with Mr G. Ordway and Mrs.
Johnson. She will visit her
brother at Detroit.

Mr Bob Bucholz returned
home Monday night after hav-
ing spent a short holiday in
Spokane, Wash.

and Mrs A. R. Ballantyne
George, who have been holi-
daying at Chillawack and the
latter, returned home Tuesday.

Mr Geo. Ordway left Sun-
day by motor for New York to
visit his parents. Mrs. Johnson
accompanied him as far as De-
troit.

Mrs. Reburn, of Medicine Hat
and suddenly in her home last
Wednesday. Mrs. Reburn had
many friends in Redcliff who
will mourn her passing.

Mr and Mrs T. Dutton of
Claremont have arrived in
town to attend the funeral of
the late Mrs. E. Jones, which
will take place at Gordon Mem-
orial church on Thursday after-
noon at 2 p.m.
